

# CABANACOAST®

## Commercial Replacement Chair Glides – Model Number 61000-001

Fits CABANACOAST® aluminum dining chairs and aluminum dining tables

Self leveling - no more wobbling chairs or tables

Saves wear and tear on furniture and floors

Allows chairs to be moved more easily over floor or patio irregularities

Safe for wood decks, brick pavers, concrete, linoleum, parquet, hardwood and tile.

Outlasts regular glides by up to 10 to 1

No more screeching legs against concrete

No more gouged decks and scraped floors

Made from Delrin®, an extremely hard, slick and long wearing plastic

The reinforced web design has extra thick bottoms and sides

The resilient neoprene flex -cushion foam continually adjusts glide surface to match floor differences

The high strength waterproof adhesive bonds glide and foam to chair

Suitable for indoor or outdoor use

### *Easy to install:*

1. Remove existing threaded glide and clean bottom surface if necessary.
2. Press push-in fastener through the hole from the inside of the hollow cup.
3. Using a small hammer, tap the cup and fastener assembly to the bottom of the chair or table leg. The press-in fastener should firmly grip into the threads inside the leg and hold the cup firmly in place.
4. Remove one side of the liner paper from the neoprene disc and apply the exposed adhesive to the honey-comb surface inside the glide body.
5. Remove the other side of the liner paper from the neoprene disc and push the glide body into the attached cup.
6. Set the furniture upright. It may be used immediately. The glides will self-level and achieve maximum adhesion within 24 hours.
