

## How to Apply Touch-Up Paint:

Here are some tips on applying touch-up paint to achieve the best results:

- If the paint finish is raised around the area that you're touching up, buff the area lightly with fine-grit sandpaper
- Clean area with water and mild soap; allow to dry completely before applying touch-up paint

### *Solid Paint Finish:*

- Apply touch-up paint with a brush or a clean cloth/rag
- Re-apply as necessary to match the existing paint finish

### *Hand-Brushed Finish:*

- Apply touch-up paint with a brush or a clean cloth/rag
- Once applied, leave the paint for approximately 30 seconds then "dab" it off lightly with a clean brush, running it in the direction of the "grain" of the hand -brushed finish
- Repeat as necessary to match the existing paint finish
