

CABANACOAST SOL Teak™ OUTDOOR FURNITURE INFORMATION SHEET

ABOUT Sol Teak™

Although SOL Teak™ looks and feels like natural teak, it is not.

CABANACOAST® SOL Teak™ Outdoor Furniture is made from virgin MGP (Marine Grade Polymer) which is extruded under high pressure. The grain runs throughout the entire frame thickness and each joint is bolted together using stainless steel hardware and further reinforced with a specialized adhesive.

CARING FOR YOUR Sol Teak™ OUTDOOR FURNITURE

Properly caring for your outdoor furniture will extend its life, enhance its beauty, as well as retain your warranty.

We recommend that you wash your furniture periodically with a mild liquid soap such as car wash soap. Scuff marks on the frame can be removed with a very light abrasive - a Scotch Brite pad or non-marking sanding sponge like the below is recommended. Please note that excessive force can mar the finish.

Like real teak furniture, CABANACOAST® Sol Teak™ Outdoor Furniture is dense and weighs a substantial amount. Always lift and place Sol Teak™ Outdoor Furniture, do not drag.

CABANACOAST® Sol Teak™ Outdoor Furniture is ready to use and does not require a sealer coat. Avoid teak oil or other oil products which are used for sealing and protecting real wood as they may stain the finish.

For resistant stains apply a bleach and water wash diluted according to the package instructions for cleaning. Alcohol, citrus degreaser or mineral spirits are recommended to remove oil or grease stains. If stains are set in, several applications may be necessary.

SALT WATER CARE

No additional steps are needed for a salt water environment.

OFF-SEASON CARE

We recommend covering CABANACOAST® SOL Teak™ outdoor furniture if being left out through the winter. Protective covers for our furniture are available for purchase through your CABANACOAST® dealer.
